- Provides a persistent and cumulative effective barrier for at least 6 hours¹
- Licensed by the Medicines and Healthcare products Regulatory Agency (MHRA), providing assurance of guaranteed safety and efficacy
- Recommended for use as an antiseptic handwash and pre-operative hand scrub in theatres or other high risk areas. Also recommended for pre-operative skin decolonisation prior to surgery
Hydrex Surgical Scrub
4% w/v Chlorhexidine Gluconate
Pre-operative Hand and Skin Preparation

Why Use Hydrex® Surgical Scrub?

RESIDUAL PROTECTION
Hydrex Surgical Scrub contains the active ingredient chlorhexidine gluconate, providing a persistent and cumulative effective barrier for at least 6 hours. This ensures Hydrex Surgical Scrub keeps killing bacteria long after application for added reassurance.

BROAD SPECTRUM EFFICACY
The active chlorhexidine gluconate, a broad spectrum antiseptic, is effective against a wide range of both Gram positive and Gram negative bacteria (including MRSA), yeast, fungi and viruses.

SKIN FRIENDLY
With added emollients that keep the skin moist and protected, Hydrex Surgical Scrub can be used with confidence, ensuring healthcare professionals can fully comply with recommended scrub practices, as recommended in the AIPF Surgical Hand Antisepsis Guidelines 2014.

LICENSED CHLORHEXIDINE GLUCONATE SURGICAL SCRUB AND SKIN DISINFECTION
Hydrex Surgical Scrub has been granted a marketing authorisation by the Medicines and Healthcare products Regulatory Agency (MHRA), providing assurance that the product’s safety and efficacy has been assessed before marketing.

WHOLE BODY WASHING
Hydrex Surgical Scrub contains 4% CHG and is the ideal and recommended choice by Healthcare Professionals prior to surgery. With the benefits of persistent antimicrobial efficacy and added emollients, this is a cost effective and safe solution to help reduce the risk of infection.

INDICATIONS FOR USE
Hydrex Surgical Scrub - Recommended for use as an antiseptic handwash and pre-operative hand scrub in theatres or other high risk areas. Also recommended for pre-operative skin decolonisation prior to surgery. Suitable if hands are soiled. Use with water.

INGREDIENTS
Hydrex Surgical Scrub - Chlorhexidine gluconate Ph Eur 4% w/v detergent based solution. Contains an emollient and light perfume fragrance.
