

COVID-19 VACCINE RESPONSE

Ecolab Has Hygiene Solutions To Keep People and Environments Safe

Every step of the vaccine roll-out introduces new risks. That's why clients around the world trust Ecolab in the production stage of vaccines to keep the environment free of contaminants. Additionally, hospitals globally trust Ecolab to be their provider of infection prevention products and programs to better patient outcomes. Now, we are able to use this expertise to help you better create safe environments for patients, no matter where you are.

Our offer doesn't stop at cleaning chemistry, Ecolab uses a programmatic approach to providing safe hygiene solutions in locations all over the world. We have products, tools and people that can help you ensure a clean, healthy and safe environment for vaccination administration. We can help you train and prepare your teams in order to execute a level of cleanliness that will give clinicians and the public peace of mind.

ENSURE SAFE EXPERIENCES

Healthcare hand hygiene and surface disinfection.

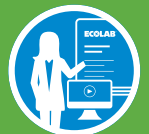

DECONTAMINATE THE SPACE

Hydrogen Peroxide vapor technology to kill organisms on every exposed surface.

LEARN FROM OUR EXPERTS

Hygiene experts and local associates to deliver training programs for all employees of any experience level.

We have proven experience supporting governments, healthcare agencies and hospital healthcare systems in mass distribution efforts to create clean environments.

ENSURE SAFE EXPERIENCES

Ecolab's hand hygiene and surface disinfection chemistries help reduce the threat of infection, giving staff and those being vaccinated confidence that they're in a safe environment.

HAND HYGIENE

A wide range of hand disinfectants and soaps.

SURFACE DISINFECTANTS

Disinfectant sprays and concentrates for equipment and high-touch surfaces.

SURFACE WIPES

Surface wipes for ease of use, with excellent material compatibility.

Use biocides safely. Always read the label and product information before use.

DECONTAMINATE THE SPACE

Automated decontamination systems and services to eliminate 99.9999% of organisms (a 6-log sporicidal kill) from every exposed surface and optional semi-permanent rooms to create a safe, flexible area to administer the vaccine.

SYSTEMS

A range of mobile decontamination systems for needs of varying size.

SERVICE

A fully scalable bio-decontamination service with rapid deployment.

BIOQUELL POD

Custom enclosure ideal for vaccine administration or safe patient management.

LEARN FROM OUR EXPERTS

Ensure the success of hygiene plans through our expert consultation and training program. Our team can help you ensure a clean, healthy and safe environment for vaccination administration, no matter where you are.

IN-PERSON TRAINING

Local experts to help train your staff and ensure they understand the healthcare safety and hygiene protocols.

VIRTUAL TRAINING

On-demand digital training resources to reinforce protocols and onboard new staff.

ABOUT ECOLAB

A trusted partner at nearly three million customer locations, Ecolab is a global leader in hygiene, energy/water and food safety technologies and services that protect people and vital resources. Ecolab has over 12,000 associates worldwide dedicated to creating cleaner, safer and healthier environments in healthcare and life sciences; from vaccine manufacturing to transportation, storage and administration.

Ecolab has the chemistry and clinical expertise to support a safe and efficient vaccine administration process. We help clean 40 billion hands, 15 million patient rooms and 3.5 billion surgical instruments annually, preventing the spread of HAIs and protecting patients.
