### **APPLICATION AREA**

Ready-to use surface cleaning and disinfection wipe acc. MDD 93/42/EEC: for medical devices.

#### **INSTRUCTIONS FOR USE**

Take single wipe. Wet surface thoroughly, ensuring contact with entire surface. Let it dry and do not rinse. Close lid after use. The use of a cleaning and disinfection wipe does not replace regular cleaning. Not for terminal disinfection of invasive medical devices. Uncritical medical devices can be cleaned and disinfected as described above. For semi-critical and critical medical devices immersion is recommended for reprocessing. Precleaning and predisinfection of e.g. probes can be done as for non-critical medical devices. Rinse thoroughly with water of drinking quality after use. For further details please consult instruction for use of medical device manufacturer. Do not use on surfaces sensitive to oxidative agents such as marble, copper or brass.
